FIX-DE-FIX[®]

The **Innovative** Solution.

WOODEN STRUCTURES STEEL STRUCTURES INSTALLATIONS POURED CONCRETE CONSTRUCTION

**The problem: And who releases the load now?
The solution: FIX-DE-FIX**

The problem is an old one. After bulky loads have been exactly positioned by crane, "somehow" the load must still be released from the holding cable. Till now that usually required time-consuming and risky "acrobatics" from a courageous employee. But now there's an end to

that! For now there is FIX-DE-FIX, the release system operated by remote control. FIX-DE-FIX, government tested and approved, opens completely new possibilities for installation work of up to two tons per piece of equipment (with safety factor 4). Various holding

devices such as chains, cables, belts, and slings can be easily used, and the complete system is all in all very simple to operate. By saving time and minimizing risks, FIX-DE-FIX soon pays for itself.

FIX-DE-FIX functions easily and safely.

- ▼ Secure the load with the holding chain
- ▼ Place the holding chain in the lift device
- ▼ Lock the lifting clamp
- ▼ Lift the load
- ▼ Set the load down in position and secure it
- ▼ On the FIX-DE-FIX remote control, press the safety button and release button
- ▼ The lifting clamp releases automatically and frees the holding chain
